PRESS RELEASE FOR IMMEDIATE RELEASE

Date: Wednesday, 20 January 2010

Title: SGE Analytical Science at Pittcon 2010

SGE Analytical Science welcomes you to its 2010 booth (#721) at the Pittcon tradeshow. For 2010 SGE presents a range of new technologies providing efficiencies and enhanced user experience(s).

Visit us to view a thorough presentation of a wide range of consumables for SPE, GC, LC, and MS instrumentation including supplies and accessories. Take part in our syringe dispensing competition to celebrate the launch of eVol[®], the worlds first automated analytical syringe, with some fantastic prizes!

NEW at Pittcon for 2010:

eVol[®] - the fully automated analytical syringe that ensures accuracy, precision and user independent results

SilTite[®] FingerTite –GC ferrules providing a guaranteed leak and air free seal, SilTite[®] FingerTite brings this advanced connection technology without the need for tools

Enhanced Syringe Range – the worlds pre-eminent syringe manufacturer just raised the bar again with our new range: Longer life, reduced carryover and increased robustness

ProteCol[®] – Inert HPLC columns using SGE's proprietary glass lined and peek lined column technology. Available in high purity C8 and C18 silica's with extended pH options, ProteCol[®] HPLC columns offer increased sensitivity and reduced non specific interactions

Xchange[®] - Robotic couplings are integrated, automated and flexible providing superior flexibility to your instrument

MEPS[®] - A micro SPE system utilising SGE's syringe technology. Can be used manually or fitted to CTC / LEAP auto sampler using the MEPS Online kit

Visit www.sge.com for more information on these exciting new products.
