

GLOBAL PRESS RELEASE

October, 2011

New Biodiesel Analysis GC Column Range and Toolkit

SGE Analytical Science has launched a new range of **BPX-BIOD** GC Columns for Biodiesel Analysis. In the 50 plus years SGE has been manufacturing GC capillary columns from end to end, the company has built a reputation of creating specialty columns that are unparalleled in achieving specific application separations. The **BPX-BIOD** GC columns follow this successful GC heritage. All ASTM International and European National (EN) biodiesel methods have been evaluated to demonstrate the suitability of **BPX-BIOD** GC columns to achieve optimal separation.

BPX-BIOD GC columns can be found in SGE's new comprehensive **Biodiesel Analysis Toolkit**. The **Toolkit** has been created as a resource for biodiesel analysis and includes method information, products and solutions to ensure you can effectively and reliably complete fuels testing according to either ASTM or EN methods. Download the **Biodiesel Analysis Toolkit** [here](#).

About SGE Analytical Science

SGE Analytical Science began manufacturing syringes over 50 years ago and now manufactures a vast array of products for chromatography and mass spectrometry. SGE is an ISO accredited company and is proud that all major analytical science instrument manufacturers rely on and incorporate SGE manufactured components in their systems. SGE is heavily committed to ongoing research and development that will allow the company to continue to bring innovative technologies and solutions to analytical science.
